

Federico Montero

Front End Developer - QA Manual

Personal Profile

After an initial career in music, in 2021 I decided to redirect my professional path towards software development, driven by a strong interest in technology. I trained at a coding bootcamp, where I acquired skills as a full-stack developer, and since then I have delved into front-end development, especially with React.js.

Additionally, I have 1 year of work experience as a QA at Cencosud S.A., which has allowed me to strengthen my ability to guarantee software quality, apply agile methodologies and collaborate effectively with multidisciplinary teams. This combination of technical skills and QA experience gives me a comprehensive perspective on the software development cycle.

My current goal is to grow professionally in Front-End Development or Quality Assurance roles, where I can contribute my technical skills and attention to detail, while continuing to develop in both areas. Outside of work, I enjoy creating music, playing soccer and sharing moments with my family.

Experience

Front-End Developer

Sunshift

La Casa de Flopi Website

HTML | CSS | JavaScript | Shopify

Mar 2025 - Apr 2025

Software Developer

Cencosud SA

Paris Marketplace OMS Team

TypeScript | React | Nest.js | QA

Feb 2023 - May 2024

Digital Operations VCP DevOps Team

TATA Consultancy Services
