Federico Montero
React Developer ⚛

Personal Profile

Music has been my primary activity throughout my life, until 2021 when I decided to make a radical shift in my career and venture into the world of software development. I enrolled in a coding bootcamp and learned **full-stack web development**. Over the years, my passion for Front-End development with React.js has grown significantly. My current goal is to gain experience within the *React.js ecosystem*, connect with inspiring professionals who can provide guidance, and **continue my learning journey consistently**. I aspire to become a React.js Developer capable of making an impact across various domains. I am currently looking for a **full-time position** as a front-end developer.
When I'm not coding, I enjoy playing music with my friends, playing soccer, and spending nice time with my family.
